

Acknowledgements

The Forestry Best Management Practices Implementation Survey was made possible through funding from the U.S. Environmental Protection Agency (USEPA) and the N.C. Division of Forest Resources (NCDFR). The USEPA funds were awarded through a grant under Section 319(h) of the Federal Clean Water Act (CWA). The N.C. Division of Water Quality serves as the state administrator of the Federal 319(h) Grant Program in North Carolina. The primary agency involved in this project is the NCDFR.

The Forestry Nonpoint Source (NPS) Branch would also like to thank NCDFR's Water Quality Foresters, Service Foresters, and forest technicians whose involvement was vital to the completion of field surveys and project feedback. Assistance in preparing this report was provided by Tom Gerow (BMP Staff Forester), Bill Swartley (Forest Hydrologist – NPS Branch Program Head), Gail Bledsoe (Water Quality and Wetlands Staff Forester), and Sean Brogan (Forest Management Program Head). Former Forestry NPS Branch staff Will Summer (Forestry NPS Senior Specialist) contributed significantly to the survey, data entry, data analysis, and technical review phases of this project. Former Forestry NPS Branch staff member Victoria Tillotson (Program Assistant) was the primary party responsible for initial data entry.

Assistance with statistical analysis methods was provided by Dr. Bronson Bullock, N.C. State University Associate Professor of Forest Biometrics and Timber Management.
